Iron Tire Aircraft Flat Tire Dolly

AERO Product ID: 500428

The Iron Tire aircraft flat tire dolly is specifically designed to be used on airplanes with a flat tire, making it quick and painless for any one-person to recover a disabled aircraft from your runway or taxiway. This ability to easily move wheels & flat tires ensures that your airport remains open for air-traffic and business.

Features

- 18,000 lbs. towing capacity
- Single person maneuvering and operation
- Can be used on the nose, tail, or main gears
- Built with versatility in mind to be used on fixed gear, retractable gear, low and high-wing aircraft
- Does not require the aircraft to move during attachment
- Enables you to bring the aircraft out of the elements into the maintenance hangar for repair
- Swivel casters allow for easy, perfect alignment of the device
- Multi-dimensional frame does not rely on single-direction pulleys or winches, making it easy to separate the Iron Tire from the aircraft
- Utilizes a universal towbar attachment on both ends

Iron Tire Aircraft Flat Tire Dolly
