5500L LAB STAND KIT

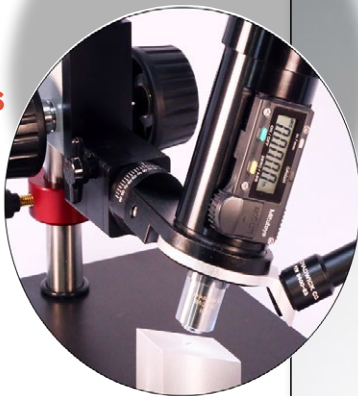

A versatile add-on for the 8400K Optical Micrometer.

The 5500L Lab Stand was designed for use with the Optical Micrometer to measure the depth of surface damage on parts that require extra clearance and for situations where it is not possible to place the Micrometer base on the surface being inspected. The Lab Stand is a practical accessory that greatly increases the applications for the Optical Micrometer.

Accommodates:

- Unusual Geometries
- Oversized Parts
- Extra Clearance
- Delicate Finishes

The Micrometer can be angled to accommodate a variety of parts.

An optional X-Y Stage is available for precise positioning of the subject without moving the Micrometer.

Kit Case Dimensions: 14" x 17" x 6" Kit Case Weight: 16.0 LBS
